**Better Allergies is a vital, standards-based addition to a safety-driven clinical workflow. Always in sight and up-to-date, it provides care teams with the support and confidence they need to deliver better care.**

Impossible to overlook, and yet fully intertwined with the everyday tasks of healthcare professionals – this was the goal behind the creation of a tool like **Better Allergies**. See all the key allergy-related information in a compact, clear, and comprehensive way, throughout a patient's electronic health record, and beyond.

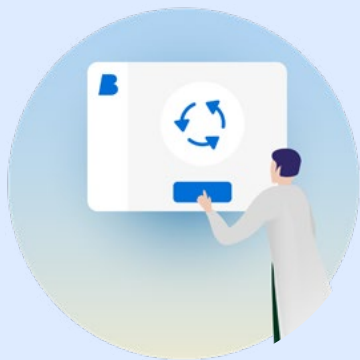

**Better Allergies** follows an ease-of-use approach, just like other solutions by **Better**. Instantly familiar, it enables you to enter, edit, or validate allergens, their status, and their reaction types, seamlessly and swiftly. Made for smooth integration, and fully configurable to your every need.

**Better Allergies** is designed to enhance patient safety. Every design decision has been made with the intention of showing key allergy information, as clearly and straightforwardly as possible. While the built-in, mandatory checks for allergies take safety to the next level.

Since data on allergens, the status of an allergy, and the reaction type is gathered in a structured way, based on **Snomed** and **openEHR** standards, **Better Allergies** has become a powerful tool – the kind that facilitates clinical decision support, bringing patient safety to the foreground.

## Easy to integrate

Just upgrade the applications you are already using.  
And configure **Better Allergies** to your needs.

Start prescribing medications more safely than ever before.
