# IT WORKS!

What did  
we learn?

# Finding #1

## Don't do everything yourself

USE A PLATFORM  
(PREFERABLY PATIENTSKY OF COURSE)

Building international,  
scalable EHR solutions  
is (very) hard

# Ask this question

# What scales best?

1. Core product across verticals
2. New types of expertise

# What scales best?

1. Reusing knowledge
2. Becoming experts in everything

# Finding #2

## Boilerplate is expensive

# Finding #3

## Health care changes

# What to do?

# Interoperability is a good thing

OpenEHR, FHIR etc.

**“KISS” THE  
PRODUCT**

Specialised modules  
not boilerplate

Build on PatientSky's  
platform and use the  
80+ services

# Some of our services...
